

sign of solutions

## Looking for a smart solution?

Wagenborg Nedliff's modular support system offers a smarter way to transport large and heavy components.

### Unique features:

- Ultra-strong
- Connectable
- For universal use

## MODULAR SUPPORT SYSTEM

### VERSATILE

Wagenborg Nedliff's modular support system is produced by a Lloyd's approved manufacturer. The system is ultra-strong, modular (connectable), easy to assemble and suitable for universal application. Among other possible uses, it provides an elegant solution for installing large bridges by land or water. The system, either as a whole or as individual components, can also be used as an angled cargo carrier, as a support structure, or as a gantry underneath girders and strand jacks.

### EASY TO CONNECT

The system is easy to connect to other equipment, such as gantry girders and modular axles. The system is designed so that it can be delivered largely pre-assembled. At the construction site, the components are connected using pins. It's not only simple and timesaving, but safe as well!

### SAFETY GUARANTEED

The system is engineered and produced in full compliance with the strict Eurocode and Lloyd's standards. Only materials from Lloyd's approved suppliers are used in the manufacturing process. Thanks to its high level of quality, the system can be used for both onshore and offshore applications, providing significant added value.

### KEY FEATURES

- Safe, sturdy, strong and easy to assemble
- 100% modular for putting together in a wide range of configurations and sizes
- Can be placed on SPMTs, slide systems, pontoons or directly on the ground
- Capacity: 1,000 tons per tower
- Lloyd's certified

## Wagenborg Nedlift

For many years, Wagenborg Nedlift has been building lasting relationships with its customers and partners at home and abroad. This allows the Wagenborg Nedlift team to offer unique, professional and safe solutions for heavy transport, lifting, engineering and additional services.

### Wagenborg Nedlift focuses on:

- Safety at work
- Skilled and sustainably deployable team
- Enduring customer relationships
- Sustainability and innovation
- Future-proof business operations

### Wagenborg Nedlift specialises in:

- Lifting and transport engineering (Wagenborg Engineering)
- Logistic solutions for complex transport issues
- Professional machine relocations
- Safe and efficient rental solutions with a modern fleet of equipment
